PUBLIC NOTICE

Coldwater Engineering has submitted a floodplain development permit application for a project on property owned by the Montana Department of Transportation located within Section 34, Township 2 North, Range 4 West. As stated in the application materials, the purpose of the proposed project is to replace two Structural Plate Pipe Arch (SPPA) culverts at the Whitetail Creek crossing along Interstate 90 (I-90) given the age and condition of the existing culverts. The existing two barrel culvert system is proposed to be replaced with a single-cell Reinforced Concrete Box (RCB) culvert to reduce flood risk and minimize environmental impacts. Per the application, the applicant is not requesting any other permits.

The complete application and associated materials submitted to Jefferson County are on file and available for viewing at the Jefferson County Planning Department located in the Jefferson County Courthouse in Boulder, Montana. Comments concerning the requested floodplain permit must be submitted within fifteen (15) days of this notice or by May 15, 2026. Mail comments to Jefferson County Planning Dept, Attn: Floodplain Administrator, PO Box H, Boulder, MT, 59632 or e-mail to lhintz@jeffersoncounty-mt.gov
